

Forum Functional Overview

Zhao Hailong | July 27, 2024

Tips

There are 3 functional layers of which to fulfil daily operational needs for final users, application administrators and system administrators:

- 1. **Application Layer**
Designed based on functionality provided to final user.
- 2. **Module Layer**
Designed based on modules need to be developed.
- 3. **System Layer**
Designed based on server service (SOA).
